Ideal for Various Industries

Mining

Transportation
(railway, airport, port)

Construction

Road maintenance
work

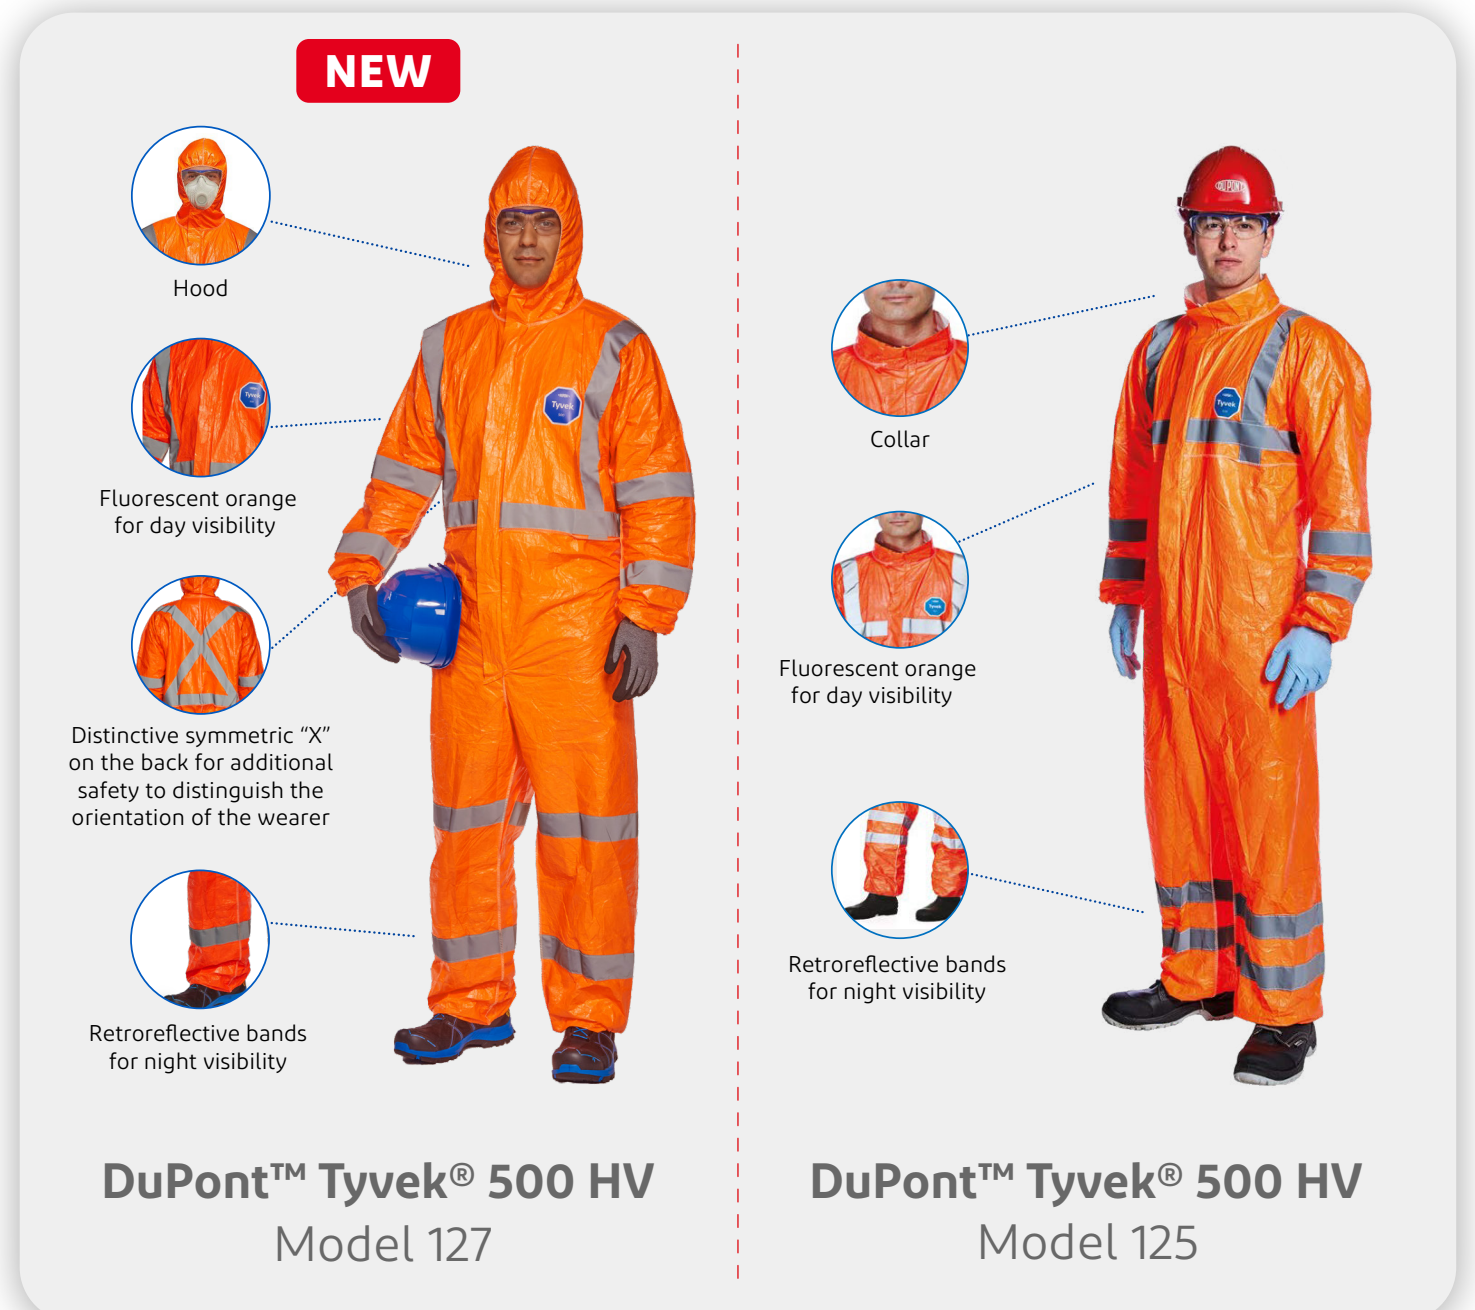

Waste
management

Unique All-In-One-Solution

Durable protection, fluorescent orange and retroreflective bands for high visibility day and night.

- **High visibility** (to the highest class according to EN ISO 20471; RIS 3279), **chemical and biological protection in one coverall** (with antistatic treatment).
- Fluorescent orange color **that doesn't wash out**: Single-use garment that fulfills the high visibility clothing requirements in the highest performance class.
- **Integrated hood** for full body protection (Model 127).
- **Lightweight, breathable, flexible and durable** coveralls made of **high quality Tyvek® material**.
- **Bio-Motion Taping**: Strategic placement of the retroreflective bands to movable joints* to distinguish a human, enhancing visibility over long distances and against bright signs or objects (Model 127).

* Above the wrist, above the elbow, above the ankle, and above the knee.

High visibility that
doesn't wash out!

Experience peace of mind: Chemical & biological protection with high visibility day and night.
